Summary

B.Tech Computer Science graduate seeking entry-level opportunities in AI, machine learning, data analytics, and Python development. Experienced in building ML-driven applications, computer vision systems, and full-stack dashboards through academic projects and internship experience. Strong communicator and collaborative learner focused on solving real-world problems with practical AI solutions.

Skills

Programming & Querying	Python, C, Java, SQL
AI, ML & Data Analytics	Machine Learning, Deep Learning, TensorFlow/Keras, OpenCV, Power BI, Tableau
Web & App Development	HTML, CSS, Flask, FastAPI, Firebase, MongoDB
Tools & DevOps	Git, JWT Authentication, REST APIs

Experience

Machine Learning Intern **1 Month**
CodeAlpha *Remote*

- Completed a one-month Machine Learning internship focused on practical ML workflows, model building, and project implementation.
- Applied Python, data preprocessing, model training, evaluation, and visualization concepts while strengthening hands-on problem-solving skills.

Deloitte Virtual Experience Programs | Forage **June 2026**
Technology, Cyber, and Data Analytics Virtual Job Simulations *Remote*

- Completed three Deloitte virtual experience programs: **Technology**, **Cyber**, and **Data Analytics**.
- **Technology:** completed software development tasks simulating client requirements, including solution design and a professional development proposal.
- **Cyber:** analyzed realistic security scenarios, identified risks, recommended mitigations, and applied incident response fundamentals.
- **Data Analytics:** performed business data analysis and forensic technology tasks to interpret datasets, identify trends, and communicate findings.
- **Skills:** Software Development, SDLC, System Design, Cybersecurity, Risk Assessment, Incident Response, Data Analytics, Business Analysis.

Projects & Research

Research Paper Assistant **Jan 2026 – Feb 2026**
Python, FastAPI, MongoDB, TensorFlow/Keras, TF-IDF

- Built a full-stack assistant that predicts subject areas from text, PDF, and DOCX files and recommends papers using Semantic Scholar, Crossref, arXiv, and OpenAlex.
- Trained a TF-IDF + Keras classifier on 41,105 arXiv abstracts, achieving 99.46% test accuracy and 0.9687 AUC.
- Added JWT authentication, query history, analytics, and a responsive dashboard for paper exploration.

Accident Detection System **Sep 2024 – Dec 2024**
Machine Learning, Python

- Designed an ML-based accident detection model using motion and sensor data to predict road accidents with high precision.
- Trained the model on real-time datasets to improve responsiveness and support road safety use cases.

Object Detection System **Feb 2024 – Apr 2024**
Python, Deep Learning, OpenCV

- Built a real-time object detection system using OpenCV and pretrained YOLO/SSD models for recognition and classification.
- Applied computer vision and image processing techniques to improve detection accuracy.
- Enhanced efficiency with multi-object tracking for automation-focused scenarios.

Image Steganography **Mar 2023 – Apr 2023**
Python, GUI-Based Application

- Developed a GUI-based image steganography system for secure data hiding and message extraction while preserving image quality.
- Designed a user-friendly interface for easy hidden data retrieval.

Education

B.Tech in Computer Science & Engineering **Expected 2026**
Vignan Institute of Technology and Science CGPA: 7.9/10

Intermediate – MPC **2022**
TSRJC, Bandarupally Mulugu CGPA: 9.5/10

SSC – 10th Standard **2020**
Telangana State Model School CGPA: 10/10

Certifications & Achievements

- **Certifications:** Programming Essentials in C and Python, Modern AI, and IoT from Cisco; DevOps from Simplilearn; Ethical Hacking from Great Learning; Anthropic MCP Server and Advanced MCP Server from Anthropic.
- **Hackathons & Ideathons:** Active participant in Smart India Hackathon (SIH) and multiple competitive hackathons at HITAM, CMR, and Vignan.

Strengths

- Communication, leadership, teamwork, adaptability, AI/ML output quality review, and continuous learning.
